

**FLICKNER
INNOVATION
FARM**

Don't miss this opportunity to join us!

Join local producers, researchers and industry leaders on August 31 at the Flickner Innovation Farm to discuss a variety of current and emerging technologies designed to improve water quality, water conservation and soil health.

8 a.m.	Overview and introductions Irrigation: SDI and PMDI Fertilizer application: chemical migration and drift Technology demonstration: Interseeder Technology demonstration: UAS	<i>Ray Flickner, Flickner Farms</i> <i>Heartland Irrigation</i> <i>Kevin Church, consulting forester</i> <i>Sarah Lancaster, Kansas State University</i> <i>Central Prairie Coop</i> <i>Trevor Witt, Kairos Geospatial</i> <i>American Robotics</i>
9:30 a.m.	R&E Goering Water Technology Farm	<i>Ryan Goering, R&E Goering Farms</i> <i>Jonathan Aguilar, Kansas State University</i> <i>Lee Wheeler, agricultural engineer</i> <i>Various industry representatives</i>
10:30 a.m.	Cover crops: Improving soil health & weed suppression Special project: General Mills	<i>DeAnn Presley, Kansas State University</i> <i>Peter Tomlinson Kansas State University</i> <i>Sarah Lancaster, Kansas State University</i> <i>Lisa French, Cheney Lake WRAPS</i> <i>Brandon Kaufman, producer</i>
11:30 a.m.	Bus transport to lunch at Grace Crossing Church Moundridge, KS	
Noon	Lunch Program and Q&A	<i>Kansas Corn</i> <i>Tim Boese, GMD2</i> <i>Doug Helmke, Kansas Rural Water Association</i> <i>Peter Tomlinson, Kansas State University</i> <i>Ray Flickner, Flickner Farms</i>

The Flickner Innovation Farm is a unique partnership created to evaluate various irrigation technologies, precision agriculture techniques and types of imagery to identify efficient methods of conserving water while improving soil health and water quality. Our team includes members of the local farming community, industry, university researchers, agronomy specialists, state agencies and other stakeholders.
