Don’t miss this opportunity to join us!

Join local producers, researchers and industry leaders on August 31 at the Flickner Innovation Farm to discuss a variety of current and emerging technologies designed to improve water quality, water conservation and soil health.

8 a.m.  
Overview and introductions  
Ray Flickner, Flickner Farms
8 a.m.  
Irrigation: SDI and PMDI  
Heartland Irrigation
8 a.m.  
Fertilizer application: chemical migration and drift  
Kevin Church, consulting forester
8 a.m.  
Technology demonstration: Interseeder  
Sarah Lancaster, Kansas State University
8 a.m.  
Technology demonstration: UAS  
Central Prairie Coop
8 a.m.  
The Flickner Innovation Farm is a unique partnership created to evaluate various irrigation technologies, precision agriculture techniques and types of imagery to identify efficient methods of conserving water while improving soil health and water quality. Our team includes members of the local farming community, industry, university researchers, agronomy specialists, state agencies and other stakeholders.
