

# Streambank Stabilization

Stabilizing a stream bank is important to reduce erosion, which can create a threat to land, water, vegetation, and wildlife along streams. Streambank stabilization projects can prevent acres of cropland from eroding in future years.

## Purpose

- Improves water quality
- Stabilizes eroded bank
- Reduces nutrient movement
- Reduces erosion and downstream sediment effects
- Provides healthy riparian areas

For more information on conservation practices in this area, visit your local **County Conservation District/NRCS Office**, or **Local Extension Office**

Or, call **(785) 650-1282**
